

AUTOMATIC PRESSES - PNEUMATIC

The Javelin Pro offers durable construction, user-friendly set-up, an advanced controller, and with high index speeds, it is the workhorse of automatic printers. Combined with our patented FlashBack, our presses are the only machines in the industry that can print and flash on all print heads without sacrificing a color. Javelin's print heads and drive systems are smooth and dependable, enabling you to take on even the most demanding jobs!

FlashBack Compatible 2 Flashbacks

The patented FlashBack is the only system on the market that allows you to print, flash, and cool all at one station. This means a eight color printer can truly print eight colors.

1 Radiant Flash

Touch Screen Control

- ▶ Advanced control system allows the Javelin to run at much higher production rates.
- ▶ Double index allows you to print two jobs simultaneously. This also permits for oversized images printed on every other station.
- ▶ Touch Screen for logical interface with operator.
- ▶ Rapid multiple print strokes with table up.
- ▶ Increased number of strokes. Up to nine per color.
- ▶ Compact control, all timers moved inside screen.
- ▶ Full diagnostic and testing from touch screen control.
- ▶ On the fly timer and stroke changes.
- ▶ Real-Time production and count data.

On-Head Print Controls

Independent print and flood speed with front and rear pneumatic screen clamp switches. Select independent print and flood speeds for ultimate control.

Maintenance Free

Fast and easy print heads with 100% pneumatic controls, mechanical stroke-length adjustments and all access control panel, eliminates the maintenance associated with automatic machines.

Our quick release floating "V" squeegee / food assembly provides consistent pressure and ink deposits. The "V" squeegees are self-leveling and more forgiving if it's been awhile since you leveled your platens. With quick release center pins, the "V" squeegees are faster and easier to use and tear down, while providing trouble free operations.

Front and Rear Micro Registraton

Super-responsive front and rear micro registration comes standard. Precision grid patterns provide excellent control and visibility of screen position.

Javelin Series Accessories

Screen printing is a versatile process, your business should be as well. Our wide variety of attachments allow you to print: infant wear, youth wear, oversized prints, sleeves, shorts and much, much more.

Please call to get the right tool for the job.

Javelin Automatic Pneumatic Printer Model

JAV-810 [8 colors-10 stations] part CA-5000C

Max print area: 16 x 18" (41 x 46cm).

With every other head (Landscape positioning) 30 x 18" (76 x 46cm).

Dimensions (Dia): 13'5" (4m).

Production capacity: Up to 600-700 (50-60 Doz.) per hour

POWER REQUIREMENTS: Electric: 110V, 50-60Hz, 10 Amps Air: 110psi (7.6bar), 30cfm (850 l/m)
