

RP-1020WSX 富怡全自动无梭芯底梭绕线机

Richpeace Intelligent round non- spindle core thread winding machine

适合于各种材质的纱线。

This machine is suitable for yarns of various materials.

RP-1020WSX 富怡全自动无梭芯底梭绕线机

Richpeace Intelligent round non- spindle core thread winding machine

**Performance introduction:**

- ◆ It has the advantages of good molding, high efficiency, simple operation, stable operation, convenient maintenance, safety and reliability.
  - ◆ From winding, forming, cutting and withdrawing, servo motor and mechanical arm are used to auto-matically complete, one-time molding, no need for secondary heating and shaping, intelligent design really liberates manpower, and a worker can see 20- 30 sets of equipment.
  - ◆ The glue or wax used in the running process of this machine are all green and environmental protection products. Because there is no spindle core in the bottom line, so this product is a real environmental protection product, and also a replacement product of the traditional core bobbin winding machine.
  - ◆ This product adopts a variety of relays, which can realize the functions of operation, stop, inching, return, line break alarm and stop, and effectively prevent the waste of resources.
  - ◆ The oil filling part of the machine is sealed by sealed cast iron gear box, which makes the machine more durable, does not need oiling, and the working environment is cleaner.
  - ◆ This machine is suitable for most embroidery machines with bobbin diameter 21mm & 23mm; if for bobbin on quilting & embroidery machine, need purchase extra cam to be suitable for the different size.
-
