

SPC-846SC 4-Color Pneumatic Pad Printer with Shuttle and Ink Cup

Features:

- 4-color pad printer with ink cup and shuttle driven by cylinder.
- Microprocessor controls each function for easy operation.
- 5-Digit auto counter is built in.
- High quality aluminum alloy is used to make structure solid and weight light.
- Inking by ink cup, ink viscosity is stable and no need to add any solvents in 6 to 8 hours, no evaporation , splash, instead, 50 % saving; Good working environment retains.
- Safety hood is equipped to meet safety demands.
- Easy install /uninstall of ink cup with good durability.
- Dwell time is adjustable to meet different requirements.
- 1-color, 2-color and 4-color printing are available.
- Unique edge structure ensures clean ink scraping and produces clear and sharp printing image.
- Extra function “twice inking, once printing” is designed for thicker ink film.
- Drying by auto air blower.

Technical Data

Ink cup size	φ 90mm
Steel plate size	100×250mm
Max. printing speed	600pcs/hr
Max. printing pressure	1155N(6bar)
Air consumption	220 Litre/min(6bar)
Power supply	110/220v 60/50Hz 50w
Dimensions	950x850x1340mm
Weight	160Kg

Printing speed is affected by loading/unloading, printing stroke, product and so on.

Designing and manufacturing special equipment according to requirement is available.

Notice: We retain the right to change outline dimension of machine and renew design without extra notice.
